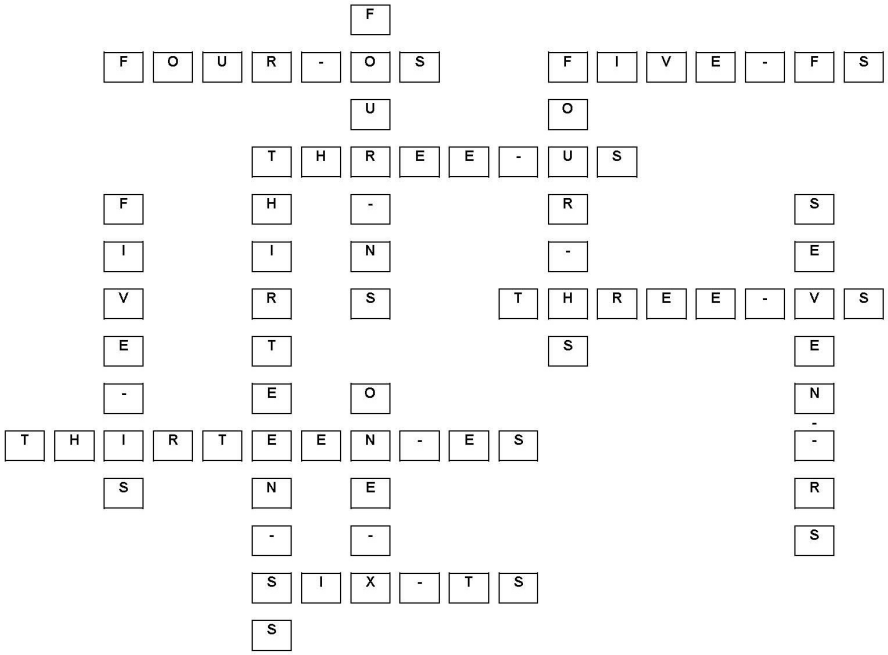
Solution to Logic Puzzle #5: The Self-Referential Crossword Puzzle
Russell Marcus

The Puzzle:

In our last puzzle, you were asked to complete two self-referential crossword puzzles. While the Puzzler designed the smaller grid, which had multiple solutions, the large grid was designed by Lee Sallows, and published in *American Mathematical Monthly*, vol 94, 1987, p 666. Sallows called his puzzle a reflexicon.



Past puzzles and solutions, are available, as always, on our website:
http://www.thatmarcusfamily.org/philosophy/Puzzles/Puzzles_Home.htm
Look for our next puzzle after break, in the April 9 edition of *The Spectator*!
